Education

Łódź University of Technology   Oct 2022 - Present
Studying information Technology at International Faculty of Engineering.

Projects and activities

SwiftBoard   May 2023 - Present
https://swiftboard.netlify.app/

I participated in a HAck NA ZDROWIE 2 hackathon.
My team got awarded first place for developing an onboarding platform utilizing Chat GPT as a virtual assistant.
My responsibilities included:

- Programming parts of the website.
- Designing the UI interface.
- Establishing relationships with potential investors and business partners.

Chess game   2022

I developed a 2-player chess game in C++ using the SFML framework and Object-Oriented Programming Principles.

- Implemented game logic, graphics, and user interface.

Trading experience   Jan 2022 - Present

Actively engaged in personal cryptocurrency trading, analyzing market dynamics and investment strategies.

- Developed a deep understanding of financial markets and enhanced decision-making abilities.
- Demonstrated an entrepreneurial mindset by seeking opportunities and making informed trading decisions.

Volunteering   Apr 2023

I contributed as a volunteer at an Academic Job Fair, providing valuable support to the academic community.
During the event I:

- Assisted with event organization, registration, and attendee support.
- Demonstrated strong interpersonal skills and professionalism while engaging with participants and exhibitors.
